

Roleplay Scenario: Daily Stand-Up Meeting – International IT Project Team

Context:

You are members of an **international software development team** working on a new **mobile app for event management**. The app is due to launch in six weeks. Your team includes developers, testers, designers, and a project manager spread across different countries and time zones.

This is your **daily stand-up meeting** — a short 10–15-minute meeting to update the team on progress, identify obstacles, and plan the next steps.

Objectives of the Roleplay

- Practice **clear and concise communication**.
- Use **appropriate professional English** in a multicultural setting.
- Manage **time and turn-taking** effectively.
- Practice **reporting progress, problems, and plans** (“Yesterday I..., Today I..., I’m facing...”).

Roles

1. **Project Manager (PM)** – Facilitates the meeting, keeps it short and focused, asks for clarifications when necessary.
2. **Front-End Developer** – Working on the app interface; has encountered a design integration issue.
3. **Back-End Developer** – Responsible for server and database; is waiting for API documentation.
4. **QA Tester** – Testing the latest version; found a critical bug affecting logins.
5. **UI/UX Designer** – Making adjustments to the color scheme and icons after client feedback.
6. **Business Analyst / Product Owner** – Communicates with the client; has new feature requests that may affect the timeline.

Meeting Flow (10-15 minutes total)

1. **Opening (PM)**
 - Greet the team briefly.
 - Remind everyone of the stand-up rules (1 minute per person, focus on *yesterday / today / blockers*).
 - Start the round.
2. **Team Member Updates**

Each person answers:

 - What did you do yesterday?
 - What are you working on today?
 - Are there any blockers or issues?
3. **Follow-Up (PM)**
 - Summarize key points.
 - Assign actions or next steps.
 - Close the meeting politely.
